The Project contemplated will provide Holley Navarre Water System with seven new rapid infiltration basins (RIBs) and new reuse water force main within the project limits. This facility also will be capable of expansion in the future and provisions will be made for later connection to the facility piping network to be made during a separate contract. The major items of the Work to be performed as part of this project includes:

- Preparation and submission of submittals for review and approval.
- Surveying and existing utility mapping.
- Obtaining construction stormwater permit from the Florida Department of Environmental Protection, implementation of a construction best management practices plan (CBMPP) for erosion and sediment control, monitoring and maintenance of the erosion control measures.
- Installation of a reclaimed force main, outfall structures, control valves, fittings, and manholes.
- Installation of air release / vacuum release valves and manholes.
- Construction of rapid infiltration basins (RIBs).
- Restoration and construction of site access include paving, grassing and stabilization.
- System startup and performance testing.
- Preparation of record drawings.

The Work will be completed in all respects within 365 calendar days from the date when the Contract Times commence to run.

Bidding Documents may be examined in Owner's office, or at Engineer's office, Jacobs Engineering, 25 W. Cedar St., Suite 350, Pensacola, FL, 32502. A complete set of Contract Documents may be obtained from the Engineer as an electronic copy via e-mail request to Seth Tatman at Seth.Tatman@jacobs.com for a cost of \$0.00. Questions regarding the Contract Documents must be submitted electronically to JACOBS through Seth Tatman no later than 4:00 p.m. CDT, August 18, 2023 in order for responses to be provided via addendum.
