Keep this checklist handy to help you use water wisely.

- **#28** Put food coloring in your toilet tank. If it seeps into the toilet bowl without flushing, you have a leak. Fixing it could save up to 1,000 gallons a month.
- **#23** Shorten your shower by a minute or two and you'll save up to 150 gallons per month.
- **#19** We're more likely to notice leaks indoors, but don't forget to check outdoor faucets, sprinklers, and hoses for leaks.
- **#5** Run your clothes washer and dishwasher only when they are full. You can save up to 1,000 gallons a month.
- **#42** Use a water-efficient showerhead. They're inexpensive, easy to install, and can save you up to 750 gallons a month.
- **#11** Monitor your water bill for unusually high use. Your bill and water meter are tools that can help you discover leaks.
- **#54** Turn off the water while brushing your teeth and save up to 25 gallons a month.
- **#12** Water your lawn and garden in the morning or evening when temperatures are cooler to minimize evaporation.
- **#14** Spread a layer of organic mulch around plants to retain moisture and you'll save water, time, and money.
- **#37** Grab a wrench and fix that leaky faucet. Faucet repair can save up to 300 gallons a month.
- **#79** Use a hose nozzle or turn off the water while you wash your car. You'll save up to 100 gallons every time.
- **#1** Water conservation starts with you. For the complete list of 100 ways to save water, visit [www.bewatersmart.net](http://www.bewatersmart.net)

There are a number of ways to save water...

Brought to you by the Water Conservation Coalition and your local water provider.

People wonder why we need to conserve water in the rainy Pacific Northwest. The fact is, we’re not the wettest place in the country. We receive less precipitation than New York and Boston. Plus, our growing population is draining existing water supplies. Look at the rain chart below. As our precipitation drops during the summer, water use skyrocket.

This brochure highlights a number of simple and highly effective ways you can save water. When you do, you’ll help protect the environment, since many other species depend on this shared resource. You’ll save money. Plus, you’ll be ensuring safe drinking water for future generations. Even a little effort can make a big difference.

#42 Use a water-efficient showerhead. They’re inexpensive, easy to install, and can save you up to 750 gallons a month.

#23 Shorten your shower by a minute or two and you’ll save up to 150 gallons per month.

#5 Run your clothes washer and dishwasher only when they are full. You can save up to 1,000 gallons a month.

#28 Put food coloring in your toilet tank. If it seeps into the toilet bowl without flushing, you have a leak. Fixing it could save up to 1,000 gallons a month.

#12 Water your lawn and garden in the morning or evening when temperatures are cooler to minimize evaporation.

#11 Monitor your water bill for unusually high use. Your bill and water meter are tools that can help you discover leaks.

#79 Use a hose nozzle or turn off the water while you wash your car. You’ll save up to 100 gallons every time.

#54 Turn off the water while brushing your teeth and save up to 25 gallons a month.
